

SOLID EDGE STARTUP PROGRAM

Make something great with Solid Edge

Free CAD Software for Startups and Entrepreneurs

Get Started

As a startup, we understand you need to get your products and services to market as quickly as possible. With Solid Edge, you can make your ideas a reality. And with our Solid Edge program for startups, you can get started for free.

What is the Solid Edge for Startups Program?

The Solid Edge Startup Program supports startups in the critical stages of their design and development process and helps them to get their product to market quickly.

The startup package includes an easy-to-use CAD software which incorporates mechanical and electrical design, advanced simulations, data management, cloud based services, manufacturing automation and much more.

What is included?

- One year free usages of Solid Edge software (no application fee requested)
- Access to Solid Edge training & best practices resources
- Guidance from a community of product experts
- Co-marketing opportunities

Collaboration with Oxford Innovation

Siemens partners with Oxford Innovation to support startups across the UK coming from various industries. This mutually beneficial partnership aims to assist startups looking to access the industry and become part of the global ecosystem within their sector.
